

Clarifications based on pre-bid meeting held on 12-12-2012, 15:00 Hrs at conference room, ground floor, Computer Center regarding "Server consolidation and backup solution".

1. Number of ports to be activated in SAN switch can be taken a minimum of 8.
2. Both 2.5" and 3.5" form factors must be supported for the drives in the storage boxes.
3. Point 3b about 4 back-end paths can over ride the minimum of 8 lanes in point 8.
4. RAID level for the internal storage of server can be the choice of the vendor.
5. The word "at the same time" in specification point 1c of storage module can be considered as deleted.
6. Licenses of OS and database as required to demonstrate installation and integration shall be included along with the bids.
7. The word "ISCSI" can be replaced with "ethernet" for the specification point 13 on page 13.
8. Along with the options listed on page 18, 100% NLSAS drives for a backup capacity of 30TB is to be added under the backup storage module as Option-5.
9. The word "back plane" in specification point 3a on page 11 can be considered as deleted.
10. The CISCO network switch mentioned in module 4, specification point 2 can be considered to be of Layer-3 architecture with dual power supply.

The technical committee approves for incorporation of these clarifications / modifications in the tender document.
