

**The following technical specifications are modified in the tender no: BIO/SMAH/018/2014 dated: 24.11.2014 to offer Next Generation Sequencer (NGS) as two bid system. All other specifications and terms/conditions remain unchanged.**

**Point: 2**

System should be offered as complete unit for performing template DNA amplification and sequencing.

**Point: 3**

The sequencing chemistry should be robust and peer reviewed.

**Point: 4**

The sequencing workflow should allow fully automated for template amplification to sequencing.

**Point: 8**

The sequencer should have the high quality data to the genome accuracy.

**Point: 10**

The system should be offered suitable chemistry for different applications.
