Specification for Video Wall Smart Signage Display

Limited Tender

1. Introduction:

These requests for quotations are to be in two parts – Technical and Commercial. This tender is for a solution to setup hardware and software for Video Wall Smart Signage Display. The display will be setup on the atrium of ICSR building in ground floor. **Bidders are advised to visit the site before quoting and have to provide the design and concept to the ICSR Information Technology section** (if required we may see similar system installed in this manner by the bidder). The scope of procurement as part of this tender includes the following items Hardware, Software, Installation and Warranty.

2. Display setup:

The display should be in horizontal manner (3*1) supported by 55" screen of 3 No's with minimum 3.5mm bezel thickness. Necessary accessories to support the display need to include, the software and all required cable for video, audio and network needs to include.

The solution should support the following display features.

- The display should support multiform file formats such as VGA, Video, AVI, MOV, MPG, DAT, VOB, PPT, PDF, JPEG, GIF and so on
- All three screens should display individually with different file format at a time
- Combination of 2+1 display with different file format at a time
- All three screens with seamless display
- Feature to display text message / images as banner in seamless display
- Features to display text message in scrolling while running video or presentation – this should be in seamless single / individual display
- Provision to add screens to merge with the existing solution
